I now know I wouldn't want to work in a lab but I am still interested in the sciences. I am very capable of graduating and going to post-secondary school. It will be hard but I can do it. I loved this program and it was a great opportunity. I would do it again if I could.

I have learned more in a few hours than I have in 4 years in high school science.<sup>99</sup>

"Increasing the number of Indigenous students graduating from science and engineering programs in Canada." in 2018, since the program I have graduated high school and I'm now attending the University of British Columbia. I am going into my second year of Kinesiology in the Fall. I'm a Terry Fox Humanitarian Award recipient and UBC Presidential Scholar. I plan to have a career in medicine. I'm interested in being involved in an ambassador program and being an ambassador for the Kirkness Foundation.

I attended the Kirkness program

### OUR FOUNDATION'S MANDATE & MISSION

The Verna J. Kirkness Education Foundation Program addresses the under-representation of Indigenous (First Nations, Métis, and Inuit) students at Canadian Universities by offering scholarships to Indigenous grade eleven students to spend one week in a campus research laboratory. During the week students meet role models, learn about support systems on campus and experience the excitement of doing research.

Our mission is to increase the number of Indigenous students graduating from Science and Engineering Programs in Canada. The VJKF Program develops motivated role models who foster the importance of graduating from high school and obtaining a postsecondary education.

#### Verna J. Kirkness

Dr. Verna J. Kirkness is a member of the Fisher River Cree Nation in Manitoba. She is a lifelong advocate of Indigenous Education and has created many learning opportunities for Indigenous people at all levels. Her work to extend new programs, access and support services, and cultural enrichment have been the foundation on which scholars have continued to build.
